

How do I know if NUPLAZID[®] is right for me?

ONCE-DAILY
NUPLAZID[®]
(pimavanserin) 34mg capsules

If either you or the person you care for is living with hallucinations and delusions associated with Parkinson's disease (PD), you're not alone. Around half of the people living with Parkinson's may experience these symptoms over the course of the disease. Getting help starts with talking to your doctor—and this guide can help navigate your conversation and get you started with a treatment plan that's right for you.

Bring this guide to your next doctor's appointment, and ask your doctor the following questions:

Why could NUPLAZID be right for me?

Are there FDA-approved treatments for people with PD-related hallucinations and delusions?

Will NUPLAZID interact with my PD medications or affect my motor symptoms?

What are the key things to know about NUPLAZID?

When could I see results with NUPLAZID?

Indication

NUPLAZID is a prescription medicine used to treat hallucinations and delusions associated with Parkinson's disease psychosis.

What is the most important information I should know about NUPLAZID?

- Medicines like NUPLAZID can raise the risk of death in elderly people who have lost touch with reality (psychosis) due to confusion and memory loss (dementia).
- NUPLAZID is not approved for the treatment of patients with dementia who experience psychosis unless their hallucinations and delusions are related to Parkinson's disease.

Please see additional Important Safety Information on reverse side and accompanying [Prescribing Information](#), including **Boxed WARNING**, also available at [NUPLAZID.com](https://www.nuplazid.com).

What is the dosage of NUPLAZID® (pimavanserin)?

Important Safety Information (cont'd)

Who should not take NUPLAZID?

- **Do not take NUPLAZID if you** have had an allergic reaction to any of the ingredients in NUPLAZID. Allergic reactions have included rash, hives, swelling of the tongue, mouth, lips, or face, throat tightness, and shortness of breath.
- **Do not take NUPLAZID if you have certain heart conditions** that change your heart rhythm. It is important to talk to your healthcare provider about this possible side effect. Call your healthcare provider if you feel a change in your heartbeat.

What other warnings should I know about NUPLAZID?

- **QT Interval Prolongation:** NUPLAZID may increase the risk of changes to your heart rhythm. This risk may increase if NUPLAZID is taken with certain other medications known to prolong the QT interval. Tell your healthcare provider about all the medicines you take or have recently taken.

Please also see **What is the most important information I should know about NUPLAZID?**

What medicine might interact with NUPLAZID?

- **Tell your healthcare provider about all the medicines you take.** Other medicines may affect how NUPLAZID works. Some medicines should not be taken with NUPLAZID. Your healthcare provider can tell you if it is safe to take NUPLAZID with your other medicines. Do not start or stop any medicines while taking NUPLAZID without talking to your healthcare provider first.

What are the common side effects of NUPLAZID?

- The **common side effects** of NUPLAZID include swelling in the legs or arms, nausea, confusion, hallucination, constipation, and changes to normal walking. These are not all the possible side effects of NUPLAZID. For more information, ask your healthcare provider about this medicine.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088. You can also call Acadia Pharmaceuticals Inc. at 1-844-4ACADIA (1-844-422-2342).

How should I take NUPLAZID?

The recommended dose of NUPLAZID is one 34 mg capsule once per day, taken by mouth, with or without food.

NUPLAZID is available as 34 mg capsules and 10 mg tablets.

Please read the accompanying [Prescribing Information](#), including **Boxed WARNING**, also available at NUPLAZID.com.
